# Unconscious Spacetime

The following text has emerged between 1993 and 1995 and was initially titled “elementary philosophy”.

me, conscious

see

changes: time

more than one thing,

something else than me: space

want: pictures change

take least complex explanation

food: own body exists

protection: outside world exists

sex: others exist, men and women

unconscious communication

usually only between men and women:

unconscious exists

it can think everything the conscious can

and see part of the future

quantum mechanics and relativity

virtual particles exist ( $v > c$ )

everything is influenced by everything

that is, was and will be
