

exactphilosophy.net

avantgarde

Welcome to my garden. . .

My web site exactphilosophy.net is essentially a garden. From time to time, new things grow and sometimes others are cut back, hopefully becoming more and more beautiful and natural in time. While some articles and exhibits in the "artemis" section are rather curiosities or art, others are very straightforward and self-contained presentations of quite specific facts or ideas. Over time, some of my thoughts might appear as generally accessible books. See the website of my one-person publishing company at artecat.ch:
